VIRTUAL INCUBATOR Russian "brains"

Alexander Shalumov

Research Institute ASONIKA, Russian Federation
(Skolkovo resident - IT)

CEO, Prof., Dr.

e-mail: ALS140965@mail.ru

What is **the problem?**

Corruption and incompetence Russian
officials leads to the fact that most
outstanding Russian scientists **has no**
public funding for research and
development

What is the way out?

On the basis of research institute
"ASONIKA" and funded by the US
organizations and foundations to
create

VIRTUAL INCUBATOR
Russian "brains"

www.asonika.com

ASONIKA - an automated system for ensuring the reliability and quality of equipment.

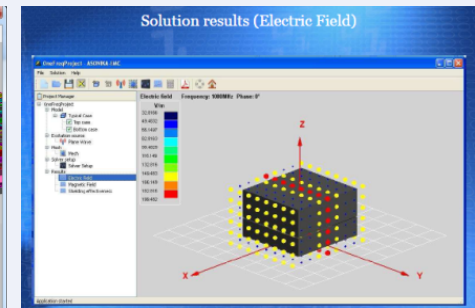

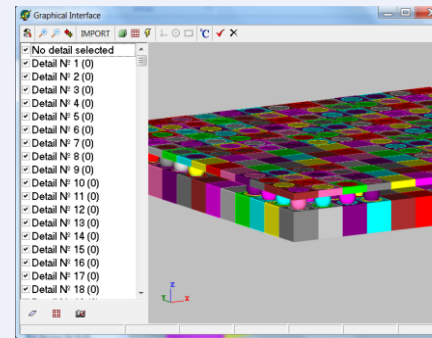

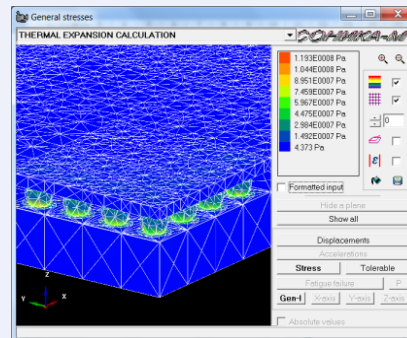

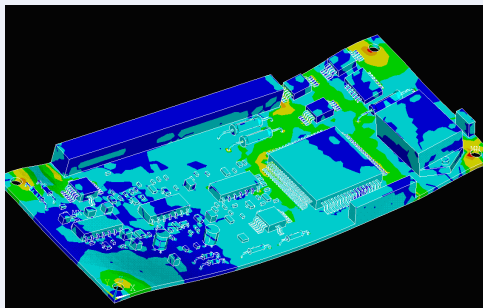

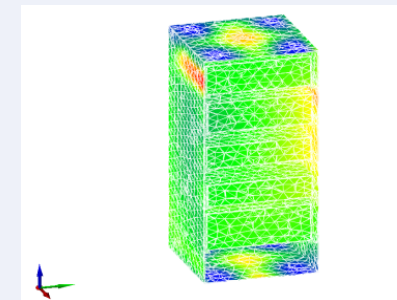

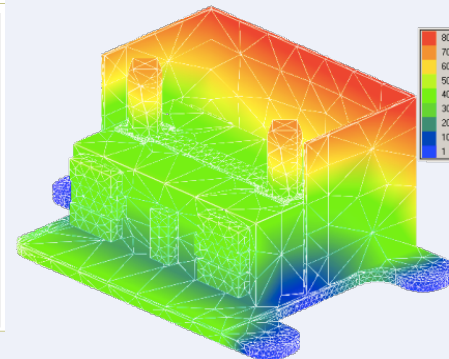

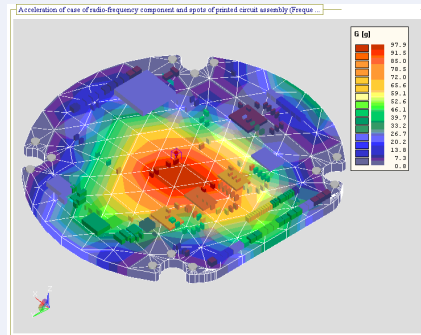

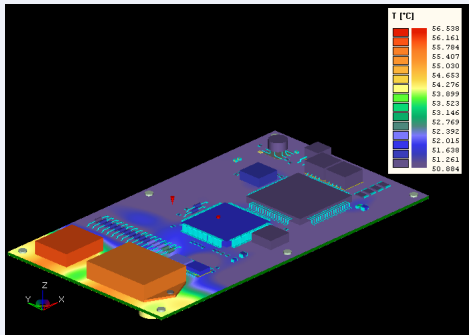

Our team has **40 years** developing a system **ASONIKA** for Accelerated Simulation of Thermal and Mechanical Reliability of Electronic Devices and Circuits.

10 years **ASONIKA** applied to the International Space Station (**ISS**)

ASONIKA - monopolist in electronics modelling on external influences in Russia

www.asonika.com

- The more complex the technology, the more there is of new challenges:**
- 1. Modeling of electronics under the influence of radiation and electromagnetic influence.**
 - 2. Creation of a database of electronic components comprising attributes for modeling and etc.**

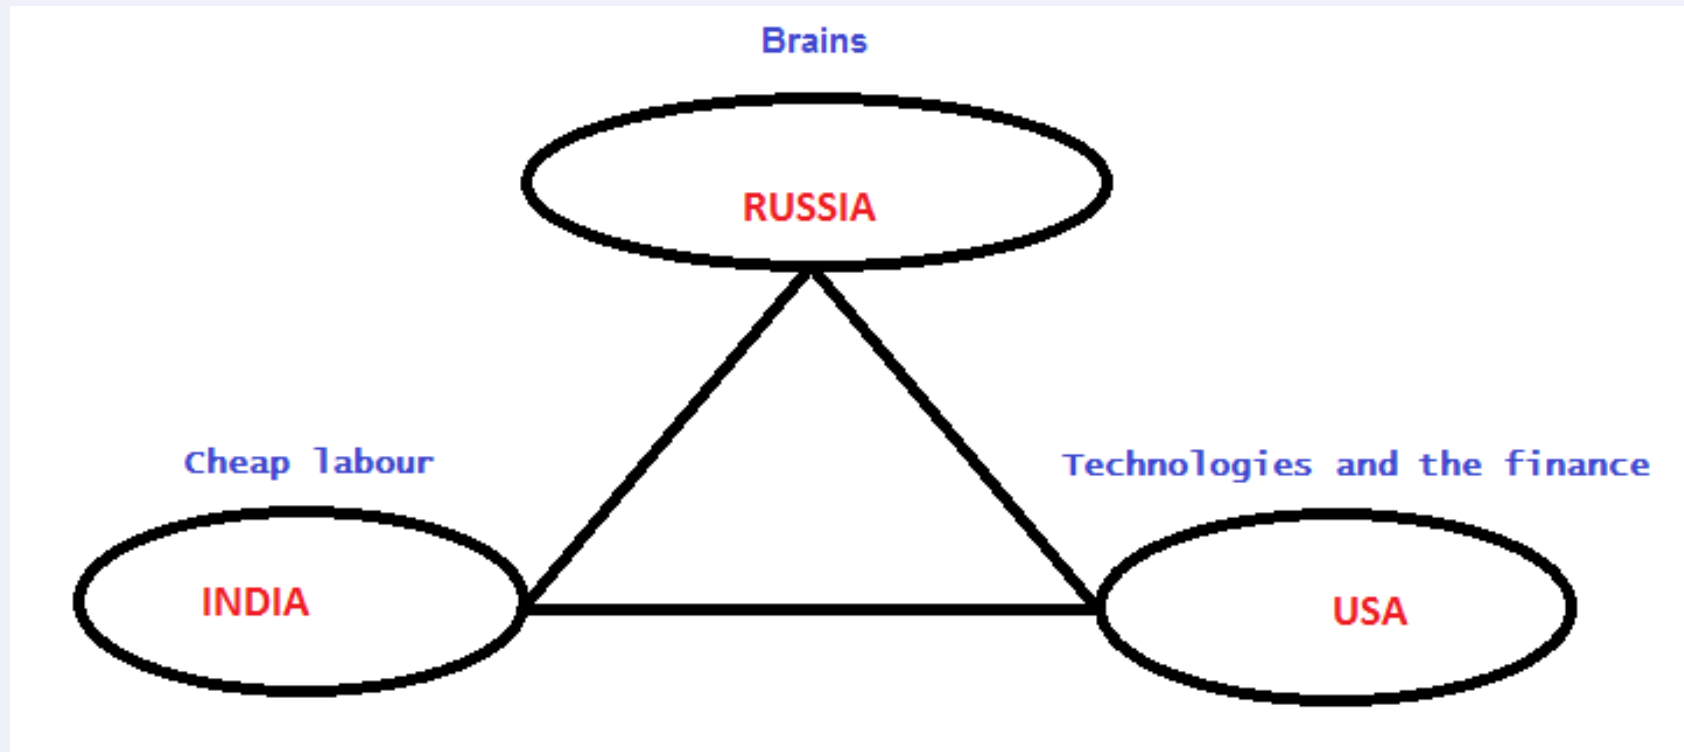

www.asonika.com

1. Research institute **ASONIKA** is ready to **collect** in **Russia** all **developers-monopolists** who are not supported by the state.
2. In **India** in **Bangalore** the modelling **Center «ASONIKA»** now is created.
3. **Support of this project in the USA** is necessary. I suggest all wishing to join this project.

www.asonika.com

The basic idea – triangle creation

www.asonika.com

What is the **benefit** of the **project participants?**

1. The monopoly ownership of important market segments in Russia and India.
2. Using cheap "brains" in Russia in the field of innovation.
3. The use of cheap labor in India for the accelerated implementation of innovations.

Now, thanks to the **incompetence** of
the **Russian officials** there are all
possibilities for the realization of this
project.

We must have time, because they may
come other officials who forbid it to
do.
