

## **Materials and devices for space applications**

In the framework of the satellite workshop on “Nanotechnology in Space” at the NGC2017 conference we plan to discuss organization of new community of material scientists and device designers to explore opportunities to create new materials and devices for space applications.

If you are interested to join discussion on that matter, please, visit the workshop sessions on September 19<sup>th</sup> at the Tomsk State University.

If you have any questions, please, contact Anatoli Korin via email:
