

INTELLECTUAL PROPERTY IN ACADEMIA

Nadya Reingand

Patent Hatchery, USA

admin@us-patent.info

In this presentation we'll address multiple questions related to intellectual property rights for people working and studying at universities. Does the author own the invention? What is the typical compensation for the author? How to communicate with the Office of Technology Transfer? How much the patent costs? Does industrial sponsor have a right in the invention made under the contract? What does joint ownership of the patent by two universities mean? Who owns inventions in government contracts with universities? These and other questions will be discussed in an interactive manner.
